REPLACEMENT PARAGRAPH

A1
In FIG. 1, a cardiac balloon catheter 50 is shown including an anchoring balloon structure 20. A primary balloon member 56 is disposed about the catheter 14 for inflation (via port 22) within the body (e.g., within the heart) to provide a transmission waveguide for projecting radiation to the tissue. The anchoring balloon structure 20 is shown engaged in direct contact with of a body lumen 52 (e.g. a pulmonary vein).
